

José Carlos Cañedo

Android Developer

Guadalajara, Jalisco · [linkedin.com/in/jc-canedo-android](https://www.linkedin.com/in/jc-canedo-android) · +52 669 4031 974 · jc.canedo16@gmail.com · jccanedosilva.github.io

Android Developer with experience in creating native (Kotlin) and cross-platform (Ionic/Angular) applications. Specializing in modern architectures such as MVVM and Clean Architecture, and key Android development technologies like Retrofit, Jetpack Compose, Room, GraphQL, and Dagger Hilt. Proven experience in publishing and maintaining applications on the Play Store, with 3 years of self-taught learning and 3 personal projects developed. Seeking to apply my skills in the development of innovative, high-performance mobile products.

PROFESSIONAL EXPERIENCE

Suma te lleva

Mobile Developer

Zapopan, Jalisco

Julio 2025– now

- End-to-end development and maintenance of hybrid transportation applications using Ionic and Angular, implementing Clean Architecture to ensure scalable and maintainable codebases.
- Engineered native functionality integrations through Capacitor, managing hardware components such as Push Notifications, Google Maps SDK, Geolocation, Camera, and QR Scanner.
- Led the full deployment lifecycle, including app signing and publishing on both Apple App Store and Google Play Store, managing versioning and store compliance.
- Developed robust RESTful APIs using Express.js, architecting backend logic and performing advanced SQL Server database management (Schema design, complex queries, and optimization).
- Collaborated in agile environments using Git/GitHub for version control, focusing on UI/UX consistency and high-performance mobile execution.

Grupo STI

Mobile Development Intern

Mazatlán, Sinaloa

January 2025 - June 2025

- Developed an application from scratch using Ionic, Angular, and Capacitor, delivering the final project within the established deadlines, as well as publishing it to the app stores (Play Store and App Store).
- Performed maintenance and released updates for an e-commerce app for a major sporting goods retail company using Android and Java, working with the Mastercard Gateway SDK for online payments, UI management with XML, RxJava, OkHttp, and data persistence with SQLite.
- Used GitLab for version control.
- Used Figma to follow UI/UX designs.

TECHNICAL SKILLS

- **Languages:** Kotlin, Java, Typescript y SQL
- **Android Development:** Jetpack Compose, XML Views, Room, Dagger Hilt, Retrofit, Coroutines, Navigation Component, Maps SDK, GraphQL.
- **Cross-Platform Development:** Ionic, Angular, Capacitor.
- **Architectures:** MVVM, Clean Architecture.
- **Backend:** Express.js, SQL Server.
- **Languages:** English (Intermediate - B1)
